

ЧЕМУ МЫ УЧИМ? – Определениям или умениям?

**«Образование должно учить не предметам, а
КОГНИТИВНЫМ умениям и навыкам»**
(Р.Шенк)

Навыки, формирующие умение «думать» (в т.ч.
«клинического мышления»):

- 1) Навык воспринимать и описывать
- 2) Навык анализа и логических операций
- 3) Планирование и постановка целей - как
ключевой процесс, без которого невозможна
какая-либо деятельность

Современное обучение в медицине

Теоретическое изучение базовых понятий

Отработка навыков решения ситуационных задач

Effect of Pregnancy on Ulcerative Colitis

She is started on mesalamine and the dose is titrated to 4.8g/day. She uses the corticosteroid enemas for two weeks and then discontinues them due to clinical improvement.

You see her in follow up in the office three weeks later and she is back to her baseline of two formed bowel movements a day without blood.

The patient is concerned that her pregnancy may affect the course of her ulcerative colitis.

True or False?

Pregnancy affects the course of inflammatory bowel disease adversely.
